Skills

- JavaScript | Typescript | ES6 | HTML | CSS | SCSS | NodeJS | jQuery | Jest | ReactJS | Redux | NextJS
- Tauri | Microservices | Micro-frontend | Jira | Git | Scrum | English | Vietnamese

Experience

Front-end Engineer

Freelance

HCMC, VN 3/2024 - Present

- Freelance on an E-library project, working 16 hours a week.
- Leverage ReactJS, JavaScript, HTML, and Sass to build a scalable app from scratch.
- Apply the Atomic design pattern.
- Start developing a personal website, allowing freedom to keep up with new technology and develop myself as a full-stack developer.
- Apply unit testing as a best practise.

Front-end Engineer

HCMC, VN 7/2022 - 1/2024

- Developed [Mavis Hub 2.0](#), a game launcher enabling users to view, download, and play web3 games.
- Utilized Tauri, Next.js, and ReactJS to replace the previous version, delivering an enhanced UX/UI design and additional features.
- Improved the code structure and established coding conventions to support project scalability and team expansion.
- Managed bug fixes and maintenance tasks for the original version of Mavis Hub.
- Contributed to App.axie, a marketplace for Axie Infinity items, by developing a micro front-end unit for the game section.
- Developed a bridge for asset transfers between Ethereum and Ronin Chain.
- Collaborated with cross-functional teams to balance workloads

Front-end Developer, Team leader

HCMC, VN 7/2020 - 6/2022

- Implemented the front-end side for various microservices, ensuring seamless integration and performance across the platform.
- Developed multi-tenant web views for Tenant Smart Watch Apps (Fossil, Skagen, Citizen) with code structures and conventions.
- Collaborated directly with designers, BAs/POs, and clients to align on project requirements and deliverables, enhancing communication and project outcomes.
- Managed a sub-team of 3 members and 2 interns, providing mentorship, designing the team's roadmap, and planning work streams.
- Developed the Watch Face Gallery for the Fossil App, enabling users to browse, download, and apply watch faces, enhancing user engagement.
- Created the Brand Portal, an internal website for managing content/resources (watch faces, banners, info cards) for brands like Fossil, Skagen, and Citizen.

Front-end Developer

HCMC, VN 5/2017 - 3/2020

- Developed and maintained front-end features for Shout For Good using HTML, JavaScript, ReactJS, and SCSS, ensuring responsive and user-friendly UI for a charity website connecting organizations and donors.
- Transitioned to full-stack development for the last 4 months, implementing back-end tasks with Ruby on Rails and managing databases (add/remove/edit records, joint tables, data returns).
- Collaborated with BAs and clients to clarify ticket acceptance criteria, analyze requirements, and identify potential issues before sprint planning, ensuring clear understanding and effective solutions.
- Proposed ideas to clients, gathered feedback, and refined solutions; conducted demos during implementation to ensure alignment.
- Led sprint demos, presenting to clients and receiving feedback for clear communication and thorough explanations.
- Contributed to Revey, a sales platform, by attending grooming and sprint planning sessions to analyze and clarify requirements and working on front-end tasks using HTML, JavaScript, EmberJS, and SCSS.

Software Engineer, Intern

HCMC, VN 7/2016 - 9/2016

- Worked in a team of interns developing a mock UserManagement System in C#/.Net environment.

Education

Bachelor of Science

HCMC University of Technology, VNUHCM

HCM, VN 7/2012 - 5/2017

- Major in Computer Science and Engineering

Others

- KMS NEXT Training Program 7/2017 - 9/2017
- Test of English for International Communication - TOEIC Certificate: 745/990 8/2016
